Emko - Education Expert

Emko aims to offer high quality and modern products to its customers with affordable prices in every field of the education since 1979.

We put our signature under every product we offer,

The reason why we have a high quality brand value in the domestic and international arena is that we design and manufacture our products by ourselves and go through quality control process. Our number one mission is always to leave happy customers behind us.

We offer solutions special for you,

We use our own production infrastructure to tailor the needs of our customers. We know that each of our customers is special, and we design your solutions with our experienced team.

We design functional products,

In all our designs, we bring forward the functionality; We support our high quality perception with the functional use of eye-catching designs.

We are developing the products with pedagogical and didactic approaches,

In our solutions in the field of education, we examine the use of the products in a pedagogical and didactic sense, we finalize product designs by the support of educators.

We systematically manage mechanical and technological R&D processes,

We are developing our R&D processes in both mechanical and technological fields. We manage our R&D companies by approving our projects to registered companies such as Scientific and Technological Research Council of Turkey (TUBITAK).

We provide the use of analog and digital technologies together,

We have years of experience in educational technologies, educational furnitures, writing boards and visual communication. In this sense, using technology in education, using analog and digital technologies together, we aim to bring the perfection to the education process in the technological sense.

We care about the environment

In our ISO 14001 certified company, we make environment-friendly production. Using ecological surfaces, FSC certified wood and paper products, recyclable aluminum and plastics, we implement waste management at European standards.

We manage people righteously and fairly without discrimination,

We have a people management policy in accordance with OHSAS 18001 standards. For us, happy staff means happy customers. For this reason; we pay strict attention to staff recruiting politics without distinction in the sense of politics, religion, gender and race.

Now let's talk about quality!

Experience the sense of quality in education with us by joining the Emko family.

Let's design the future classes together!

Whiteboards are cooler now ...

Airboard whiteboards with depth design without frame, special design assembly, give depth to walls. Enamel surface is used for a long time, thanks to the magnetic handle provides the opportunity to use as a board.

New trend on the board ...

Change your perspective on writing boards...

More than a board ...

Airboard; writing board, projection screen, panel purpose use, designed with special design profiles in combination with sera, can be converted into stylish, decorative compartments.

Let your imagination shape with
Airboard concept.

Writing boards, shaped according to institution logos and different designs, gives a new identity to fields of education.

Board and panel merged with Noteboard ...

Noteboard; creates a new style in writing boards by merging enamel and bulletin board unfamed. It reflects your imagination on the wall with its structure that can be manufactured in different shape and size.

**Opportunity to use either as a writing board
or a notice board ...**

We know no limit on the whiteboard.

Emko, who produces distinctive, innovative and interactive products for educational fields raise the boundaries of the whiteboards and turn the walls into the Education wall. It provides uninterrupted writing area thanks to its special mounting system. Educational wall, whether you want to work individually or in groups, provides magnetic handles to meet the need for the board.

Let your walls turn into the Educational Walls...

**Change for using of every corner
of the board actively...**

Sliding Educational Wall

Locations gain flexibility ...

In tight spaces, and in places you want to use as divisions, special solution comes with the sliding education wall. Thanks to unique rail mechanism which provides comfortable use.

Catch the New line in offices with Glassboard
